

Guideline: Critical Incident Communication and Reporting Guidelines

PURPOSE:

The purpose of this guideline is to ensure that Critical Incident reporting occurs according to health care institution/agency and educational institution policies and that relevant protocol related to students, faculty, and staff are implemented as soon as possible.

BACKGROUND:

Critical Incidents may occur in either classroom or practice settings and may occur outside of the operating hours of the educational institution. When the incident in question poses immediate or imminent danger, it requires a coordinated emergency response, and the emergency response systems of the institution(s) must be activated immediately (e.g. University of Lethbridge; Lethbridge Polytechnic; Alberta Health Services; Covenant Health).

DEFINITIONS:

Critical Incident – any sudden or unexpected event that has an emotional impact sufficient to overwhelm the usual effective coping skills of a group of students and/or the instructor, and that causes significant psychological distress in usually healthy persons (Caine & Ter-Bagdasarian, 2003).

GUIDELINE SCOPE:

This guideline applies to all NESA instructors, faculty members, and staff members at the Lethbridge Polytechnic and University of Lethbridge campuses

All those enacting this guideline are bound by the NESA BN Programs approved policies, and will take all reasonable steps to protect student/faculty/patient confidentiality to the greatest extent possible.

SPECIFICS OF THE GUIDELINE:

In the event of any Critical Incident, the instructor, faculty member, or staff member who becomes aware of the incident will notify the Program Chair/Assistant Dean at the respective institution as soon as possible, and e-mail any gathered documentation as soon as possible after the incident. The Program Chair (LP)/Assistant Dean (UL) will determine who remains to be notified and ensure that all students (and others) who need to be notified receive appropriate communication.

The individual(s) who become aware of a Critical Incident will contact the Program Chair (LP)/Assistant Dean (UL) via telephone as soon as possible following *any* event that affects NESAs BN Programs students and/or faculty.

If the incident has immediate effects in the practice setting, the practice instructor who becomes aware of the incident will contact the Practice Coordinator (LP)/Assistant Dean (UL) at the applicable campus. This individual will subsequently contact any other instructors and/or students who may be affected by the incident. On the LP campus, the Practice Coordinator will consult with the Program Chair to establish the most reasonable next steps. On the U of L campus, the Assistant Dean-Nursing will determine the most reasonable next steps.

The Program Chair (LP)/Assistant Dean (UL) will consult their respective Dean as soon as possible.

The Program Chair (LP)/Assistant Dean (UL), in consultation with those reporting the critical incident, will ensure that comprehensive and appropriate communication has taken place; i.e. that all instructor(s), faculty member(s) and students involved in or affected by the critical incident have been notified in a timely manner.

The Program Chair (LP)/Assistant Dean (UL) will consult with other resource personnel as deemed appropriate and ensure that appropriate contact with other departments is initiated as needed, i.e. contact with the Wellness Coordinator/Risk Management Officer at the respective educational institution is needed in order to initiate WCB documentation (as appropriate) according to Educational Institution Policy.

The Program Chair (LP)/Assistant Dean (UL), in collaboration with the other resource personnel will ensure that students, faculty, and/or staff are made aware of any appropriate supportive resources as required (e.g. counseling services).

NOTE: NESAs Guidelines exist within organizational frameworks of policy for Lethbridge Polytechnic and the University of Lethbridge, and within agreements established with practice partner organizations. If and when NESAs guidelines are found to differ from such policies and agreements, it is important to note that such policies/agreements will take precedence over NESAs guidelines or policies.
